### **DETAILED ACTION**

This Office action is responsive to Applicant's preliminary amendment submitted 27 April 2006.

#### ***Examiner's Statement of Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or reasonably suggest a method of characterizing an optical fiber link by calculating the polarization mode dispersion including all of the method steps as required by Applicant. Although the prior art documents cited by the Examiner and submitted by Applicant all teach a method of calculating polarization mode dispersion, none of the previous taught methods calculates the polarization mode dispersion using the same parameters and/or steps as required by the independent claims.

Examiner cited references A, C and D and Applicant submitted NPL "Polarization Mode Dispersion Mapping...." all teach calculations of the polarization mode dispersion. However, none of the documents teaches the step of iteratively determining any of the parameters to be used to calculate the characteristics of the optical fiber link. In addition, the Examiner cited references appear to be relying on different parameters to make the calculation as well, such as spin parameters, spatial periodicity, OTDR and FWM intensity.

Another close prior art of record is Examiner cited reference B. Reference B teaches an iterative method for determining the polarization mode dispersion; however, Reference B relies on different parameters to make the initial and iterative calculation. Reference B relies upon rotation angles for candidate pairs to determine the polarization mode dispersion.

**Therefore, claims 1-18 are allowed.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. None of the documents cited by the Examiner discloses or reasonably suggests the allowable subject matter discussed above.

The documents submitted by applicant in the Information Disclosure Statement have been considered and made of record. Note attached copy of form PTO-1449. None of the references submitted by Applicant discloses or reasonably suggest the allowable subject matter discussed above.
